

# Natural Resource Education

## Workshop: 4<sup>th</sup>-12<sup>th</sup> Grade Teacher Workshop July 13-July 16, 2009 2 Graduate Credits

*Trees For Tomorrow has been hosting teacher workshops since 1946!*  
The beautiful Northwoods is a great place to learn about the Midwest's flora and fauna. Expand your knowledge about managing natural resources with first-hand experience! Return to your outdoor learning sites and classroom with several hands-on activities to share with your students. This is a great networking opportunity for you to meet with other teachers and natural resource managers. This workshop is appropriate for teachers of any subject who wish to learn more about natural resources and Trees For Tomorrow.
